PROFESSIONAL SUMMARY

I am a highly motivated software engineer with over five years of combined academic and professional experience, skilled in software development, database management, and full-stack web applications. I am seeking to pursue a challenging Master's program in Information Systems Management or a related field that will allow me to deepen my technical expertise, broaden my academic knowledge, and refine my leadership abilities. Through this program, I aim to apply my personal talents to develop innovative, technology-driven solutions that address real-world challenges and contribute meaningfully to the software engineering community.

EDUCATION

Bsc in Software Engineering (Second Class Honours, 85.19%)

Oct. 2020 – Apr. 2025

Al-Azhar University – Palestine - Gaza

Relevant Modules: Operating Systems, Computer Networks, Artificial Intelligence, Data Structure & Algorithms, Automata Theory, Compiler Design, Information Security, Risk & Strategic Management, Distributed & Cloud Computing, Advanced Software Design, Advanced Software Engineering, Web Engineering.

Bachelor Thesis: Design and Implementation of “CORAL Store” – an advanced e-commerce platform built to enhance online shopping experiences by addressing the limitations of traditional retail. Leveraged modern technologies for a seamless, scalable, and secure digital shopping environment.

WORK EXPERIENCES

Software Engineer – Sahab Company

2023 – 2024 | Gaza, Palestine

Contributed to the design, development, and maintenance of software solutions across domains, participating in both frontend and backend development while applying software engineering principles and best practices.

Software Engineer & Web Developer Trainee – Areisto Company (90 hours)

Apr. 2025 – July 2025 | Gaza, Palestine

Developed and implemented backend services and data management systems for enterprise applications.

Applied software principles such as MVC and Domain-Driven Design (DDD) to achieve scalability and efficient code quality.

VOLUNTEERS EXPERIENCE & INTERNSHIPS

Volunteer – Software & IT Department – *Maghazi Community Rehabilitation Society*

2024 | *Gaza, Palestine*

- Provided technical assistance and Supported the development of small-scale data collection and reporting solutions to improve program efficiency.
- Trained staff on basic IT tools and digital practices, enhancing their ability to manage beneficiaries and program information effectively.

Software Engineering Bootcamp Graduate – *Gaza Sky Geeks*

Oct. 2022 | *Gaza, Palestine*

- Trained in full-stack web development with modern technologies (JavaScript, Node.js).
 - Collaborated with my team to build and deploy projects using agile tools.
-

SKILLS

- **Analytical & Research:** Strong problem-solving, data analysis, and technical documentation.
 - **Software Development:** Proficient in Java, C, C++, Rust, Python, JavaScript/TypeScript, Node.js, NestJS, Express, React.
 - **Systems & Low-Level Programming:** C, Assembly, memory management, CPU architecture, and OS concepts.
 - **Databases:** Database design, management, and optimization (PostgreSQL, MongoDB).
 - **Architecture & Design:** MVC, Domain-Driven Design (DDD), Layered Architecture.
 - **APIs & Integration:** RESTful API design, integration, and optimization.
 - **Soft Skills:** Collaboration, adaptability, and project management.
-
